

Free Standing Graphic Displays

ADJUSTABLE HEIGHT GRAPHIC DISPLAYS

With this unique display you have the ability to change the height of your graphic display. Made with a stand built to sit firmly on the ground. The frame is connected to the stand allowing you the option to change the height in which the graphic sits off the ground. (see example to right) This display is a great option for displays that get moved to different locations and environments.

DISPLAY OPTIONS

Free standing graphic displays are a great way to grab the attention of your viewers. They offer the ability for the display to easily be moved to different locations if desired. We provide a number of different solutions to enhance the style and functionality of these displays. We have 3 options for flat feet (see drawing below), and we also provide a curved foot which slightly raises the graphic off the floor. The curved foot also adds a unique style to the display itself. (see image top right)
